

### **Materials list for Mother Earth**

*In our first class we will be making a standing Mother Earth for your nature gardens or puppet shows.*

*I will teach how to make a simple molded head that is characteristic to dollmaking, and I will also offer a simpler way of making a doll head as well.*

*In the material list below, I have listed both loose wool and wool roving. You can easily find wool roving and wool batting on Etsy. If you want to invest in a bulk of wool for future projects, I would suggest you order from West Earl Woolen Mill in Ephrata, Pennsylvania. They sell very reasonably priced beautifully cleaned and carded wool (bats are about 2.5 pounds). This saves a lot of money ordering this way, and you always have some wool at your "fingertips" when creativity calls you!*

*I have also listed Surgitube or stockinette. Some drug stores carry the Surgitube (1" or 2") or you can also find this on Etsy as well.*

*Magic Cabin dolls also offers some lovely knit for doll skin, and they also sell other doll making supplies.*

### **Materials List**

*8x8" Piece of wool felt for body*

*Circular piece of felt the same color for bottom of dress (app. 3" in circumference)*

*2.5'x8.5" for blouse (this fabric can be felt, or thick cotton)*
